

## Web Designer (Hugo) for environmental sustainability project

KDE e.V. is looking for support to implement the KDE Eco “Sustainable Software For Sustainable Hardware” project website with Hugo. The aim of the website is to encourage more people to use FOSS to combat the rise of electronic waste and to avoid unnecessary CO2 emissions in the production of new digital devices.

### 1 About KDE and KDE Eco

[KDE](#) is an international community dedicated to developing Free and Open Source Software (FOSS) for end users. Contributions are made by thousands of talented volunteer contributors (developers, artists, marketers, translators, documentation writers, etc.) from all over the world. [KDE e.V.](#) is the legal organization behind KDE that represents and supports the community, which includes KDE Eco.

The overarching aim of [KDE Eco](#) is to strengthen sustainability as part of Free Software. This includes developing tools to improve energy efficiency in FOSS development, supporting software eco-certification within FOSS communities, and promoting sustainability solutions related to software among the general public. “Sustainable Software For Sustainable Hardware” (German: *Nachhaltige Software für Nachhaltige Hardware*, or NH4NS) is a new KDE Eco campaign to raise awareness about e-waste and the critical role of software for the long-term, efficient use of hardware.

### 2 Briefing

You will be responsible for implementing the website in Hugo in the existing KDE website structure. Therefore, you will be working together with the team of the organization. The structure and content will be provided by KDE Eco. When needed, we will get external help for the production of visual content.

The final website will be launched at the latest by mid-August 2024. However, before then we would like to have a version online including the basic structure and a homepage by 15 July.

### 3 Qualifications and skills

- Deep knowledge of CMS Hugo
- Ability to work independently within the frame of the project
- Fluent in English (verbal and written)

### 4 What we offer to you:

- The opportunity to do pioneering work around sustainable software
- Working in an open and friendly community that puts its heart into Free Software

### 5 Job Details

- Type: project based / freelance
- Location: Remote
- Paid by “Werkvertrag” (self-employed)

### 6 How to apply

Please send your application, including your **availability** and **hourly rate**, by email to [nicole.teale@kde.org](mailto:nicole.teale@kde.org) with “Web designer for KDE Eco“ in the subject.

Do not hesitate to contact us at the same address if you have any questions.
